

INTELLIGENT CUTTING & FINISHING

Jingwei Systemtechnik is a global leader in plotter and digital cutting technology. As technology pioneers, we are committed to driving a revolution through relentless innovation and continuous product enhancement. Our ever-evolving portfolio is designed to meet the dynamic needs of various industries, making Jingwei a trusted name in the footwear, apparel, packaging, signage, electronics, and leather industries.

Our innovation. Your success.

New generation cutting & finishing solution

JINGWEI

SYSTEMTECHNIK

With a 30-year legacy of innovation and excellence, JWEI has been at the forefront of cutting technology, shaping the industry with advanced, automated, and highly adaptable solutions. As the leading force in flexible material cutting in the domestic market, we have expanded globally, earning a reputation for precision, efficiency, and high performance.

For over a decade, we have been a trusted partner in the signage and surface graphics industries, delivering digital finishing and cutting systems that seamlessly handle an extensive range of rigid and flexible materials.

Our solutions are engineered to meet the evolving demands of modern production, ensuring unmatched accuracy and reliability.

With a strong emphasis on customization and intelligent automation, JWEI empowers businesses to optimize production, streamline workflows, and maximize efficiency. Built for speed, accuracy, and adaptability, our cutting-edge technology is transforming industries worldwide.

30th

30 years of technological excellence

120⁺

Active in over 120 countries & regions

300⁺

More than 300 sales and service networks

30000⁺

Chosen by over 300,000 global customers

8⁺

Servicing the needs of multiple industry sectors

200⁺

More than 200 patents and software copyrights

Product Specifications

JWEI reserves the right of final interpretation of the following parameters, subject to change without prior notice.

Model	SG1625		SG1612		SG1635	
	2 Tool heads	3 Tool heads	2 Tool heads	3 Tool heads	2 Tool heads	3 Tool heads
Multi-functional Tool Head	Multi-functional Tool Head Multi-tool fixing holes, quick insert tool fixing, easy-to-replace cutting tools, plug-and-play, set cutting, creasing, drawing, router and other functions in one, optional ATC module.					
Tools	Electric oscillating tool, drag knife, rotary tool, router tool module, plotting tools, etc.					
Fastest speed	2000mm/s *					
Max. Cutting Thickness	50mm *					
Repeat Precision	< 0.05mm *					
Cutting Materials	ABS board, PVC board, space board, aluminium-plastic board, lamp sheet, back glue, PVC foam board, KT board, acrylic, magnetic sticker, self-adhesive, etc.					
Material Fixation Mode	Vacuum absorption					
Software resolution	0.025, 0.01, 0.1 optional					
Transmission Mode	Ethernet port					
Drive System	Bus controller, advanced servo system, imported linear guide rail, lead screws, grinding level 0 backlash helical teeth					
Instruction system	HP-GL compatible format					
Rated Capacity	12.4kVA	14.4kVA	12.4kVA	14.4kVA	12.4kVA	14.4kVA
Rated Voltage	380V±10%					
Machine Weight	1515kG	1640kG	1050kG	1050kG	1880kG	1880kG
Effective Cutting Size (WxL)	1600mm×2500mm		1600mm×1200mm		1600mm×3500mm	
Machine Size (WxLxH)	2570mm×3380mm×1415mm		2570mm×2080mm×1415mm		2570mm×4380mm×1415mm	

Note: * Dependent on materials and application

Fast & precise

MES system

Automatic Tool Changer

Reimagined Design

Advanced industrial design
Featuring a polygonal fold structure for a sleek contemporary aesthetic

Enhanced ergonomics
A superior user experience enhanced by stability and durability

Optimized functionality

Smart control software
Simplified operation in a single step

Modular design, flexible splicing

Versatile operating platform
A variety of tools and blades for an efficient workflow

Noise reduction technology
Now 64db for lower sound and lower frequency

Performance that delivers

Improved speeds
Now 33.3% faster than the previous generation

New proprietary chip for precision motion
Ultra precise 0.00015s motion control for redefined speed, accuracy, and efficiency

One touch start
Effortless set-up for instant activation

Maximized Intelligence

MES System
Streamlining production for smooth operation

Automatic tool changer*
Hands free, completing complex changes with one click

Increased accuracy

Enhanced precision
Delivered by a fully proprietary control system

Advanced stability
Powered by a modular integrated machine structure

Grinding grade drive system
Engineered with a high-precision gantry control algorithm

Stronger vacuum hold
Over three times the suction power to ensure complete material stability on the bed

Additional highlights

NFC Access Control

Wireless charging

Automatic tool setting

Scene software

Automatic router tool change*

...

Our innovation. Your success.
